

Memorial Healthcare System

2018 Community Health Needs Assessment

Prepared By:

BRHPC

HEALTH & HUMAN SERVICE INNOVATIONS

M Memorial Healthcare System

Since its inception in 1953, Memorial Healthcare System (MHS) has been a leader in providing high-quality health care services to South Florida residents. Today, it is the fifth-largest public health care system in the nation and highly regarded for its exceptional patient- and family-centered care. Memorial's patient, physician and employee satisfaction rates are some of the most highly regarded in the country, and the system is recognized as a national leader in quality health care.

Memorial Regional Hospital is the flagship facility of the health care system and is one of the largest hospitals in Florida. Memorial Regional Hospital offers extensive and diverse health care services that include Memorial Cardiac and Vascular Institute featuring renowned surgeons, Memorial Cancer Institute treating more inpatients than any other in Broward County, and Memorial Neuroscience Center providing innovative technology and world-class physicians.

Memorial Regional Hospital and Memorial Regional Hospital South are both located in Hollywood, Florida, and offer our community a variety of medical and surgical services. Joe DiMaggio Children's Hospital at Memorial provides a comprehensive array of pediatric services and is the leading children's hospital in Broward and Palm Beach counties. Memorial Hospital West, Memorial Hospital Miramar and Memorial Hospital Pembroke serve the communities of western Broward County and others in South Florida. Memorial Manor nursing home and a variety of ancillary health care facilities round out the system's wide-ranging health services.

Memorial has a reputation as one of Florida's leading health care systems and is supported by a distinguished medical staff. In fact, the vast majority of physicians are board certified or board qualified in their specialties and have been trained at many of the nation's finest medical schools and hospitals. Because of its distinguished medical staff and services, Memorial draws patients from South Florida and beyond.

Our Mission

Heal the body, mind and spirit of those we touch.

Our Vision

To be a premier clinically integrated delivery system providing access to exceptional patient-and family-centered care, medical education, research and innovation for the benefit of the community we serve.

HEALTH & HUMAN SERVICE INNOVATIONS

www.brhpc.org

BRHPC's mission is to be committed to delivering health and human service innovations at the national, state and local level through planning, direct services, evaluation and capacity building.

With over 30 years of experience in developing needs assessments, BRHPC is well-positioned to assist hospital administrators in meeting the new IRS requirement for a comprehensive Community Health Needs Assessment (CHNA). For this project, BRHPC was responsible for the quantitative and qualitative data research, analysis and presentation, which included the integration of hospital-specific data sets.

BRHPC sincerely thanks the CHNA Advisory Council and all of the contributors in the realization of this project. For more information, please contact Régine Kanzki, MPH, Division Director, Broward Regional Health Planning Council, via email: rkanzki@brhpc.org.

Broward Regional Health Planning Council, Inc. (BRHPC) is one of eleven private Local Health Planning Councils established by Section 408.033 Florida Statutes (F.S.) to conduct regional health planning and implementation activities. Each council's district is designated in Section 408.032, F.S. These local organizations develop regional health plans containing data, analysis and recommendations that relate to healthcare status and needs in the community. The recommendations are designed to improve access to healthcare, reduce disparities in health status, assist state and local governments in the development of sound and rational healthcare policies, and advocate on behalf of the underserved. Local health councils study the impact of various initiatives on the healthcare system, provide assistance to the public and private sectors, and create and disseminate materials designed to increase their communities' understanding of healthcare issues.

Executive Summary

As a part of IRS regulations, hospital organizations are required to conduct a community health needs assessment which serves as a guiding document for strategic planning. By utilizing the process of developing a Community Health Needs Assessment, Memorial Healthcare System has positioned itself to address local health needs that are not being met.

Broward County is the second most populated county in the state and ranks high in diversity. A community based needs assessment aids the county in identifying and addressing the specific healthcare needs and/or gaps of local residents. The main purpose of the assessment is to improve the health status of Broward County residents and increase access and availability of healthcare services. The main goals of the Community Health Needs Assessment are to:

- Improve health status of Broward County residents.
- Address socioeconomic factors that have a negative impact on community health.
- Increase access to preventive healthcare services, especially within at-risk sub-populations.

A Community Health Needs Assessment Advisory Council was convened with the mission to:

- Guide the assessment process.
- Act as a sounding board and assist in obtaining community input.
- Participate with the Planning Team in evaluating health issues and priorities once the assessment is completed.
- Engage in collaborative action planning on an ongoing basis.

The members of the Memorial Healthcare System Community Health Needs Assessment Advisory Council participated in meetings that took place from December 2017 to April 2018. During these meetings, the council reviewed data collected per the following methodology: quantitative and qualitative data research, key informant interviews community conversations, and provider and community focus group sessions. These data sets were analyzed and discussed to identify and prioritize community health needs within the Memorial Healthcare System service area:

- Access to care;
- Preventive care;
- Community health education;
- Quality of care;
- and Emergency response.

The following provides a summary of the quantitative and qualitative data sets that were examined during the council meetings.

1,909,632
Residents in
Broward County

22,170 Births
16,201 Migrants

15,864 Deaths

22,351 net population increase

**65-74 age group had largest
growth from 2015-1016**

7,518

28.7%

of residents are
Hispanic/Latino

SUMMARY

Mean Income
\$79,147

14.4%

of all Broward residents have an income below the poverty line

22.5%

families with female head of household live below the poverty line

4.6%

↓ Unemployment Rate

2.3%

Job Growth

20.9%

Employed in education, health or social services

268,836 students in Broward County Public Schools

87.9% of adult population has a high school diploma

30.8% of adult population has a bachelor's degree

Note: FPL = \$24,600 for a family of four

SUMMARY

The number of uninsured in Broward has decreased by 9% in the past 3 years

27,470
Children in Broward County are enrolled in KidCare

All 3 age categories experienced **decreases** in the uninsured rate from 2015 to 2016.

Entry into Prenatal Care

1st Trimester Prenatal Care rates have gone down (76.2 to 74).

3rd Trimester or No Care rates have gone up (7.4 to 8.2).

2-year old immunization rates are **80.4%** which is **below** the Healthy People 2020 goal of **90%**.

Kindergarten immunization rates are **95.3%** which is **above** the Healthy People 2020 goal of **95%**.

Black babies are at a higher risk of **negative** birth outcomes when compared to their White counterparts.

	Low Birth Weight	Preterm Births	Infant Mortality
Black Babies	13.5%	14.1%	8.1%
White Babies	7.1%	8.8%	3.2%

Heart Diseases account for the **highest** number of deaths in Broward County. Representing **24.5%** of all deaths with a rate of **151.1**.

Unintentional Injuries are responsible for the **most** Years of Potential Life Loss with a rate of **1,712.8**.

Major Causes of Death that Did **Not** Meet HP2020 Goals

Major Causes of Death That Met HP2020 Goals

The Total Sexually Transmitted Infection Rate for Broward County has been **increasing** since 2011. Going from 539.3 to 707.3.

Chlamydia
533.4
per 100,000

Gonorrhea
195.2
per 100,000

2,904.4
Chlamydia Rate
per 100,000

Rates Among 15-19 Year
Old Females

433.2
Gonorrhea Rate
per 100,000

The AIDS rate in Broward has been **decreasing** since 2012. Going from 24.7 to 13.6.

The HIV rate in Broward has been had an overall **increase** since 2012. Going from 39.1 to 41.4.

Chronic Conditions

**\$3
BILLION**

Amount charged for chronic conditions in all MHS hospitals combined.

Hypertension had the highest number of chronic condition cases in MHS hospitals which accounted for over **\$1 billion** charges in 2016.

Medicare was the **payer source** with the **highest** chronic condition charges in 2016.

Congestive Heart Failure had the largest case-charge gap with **\$705 million** being charged for **6 thousand** cases.

Chronic Conditions

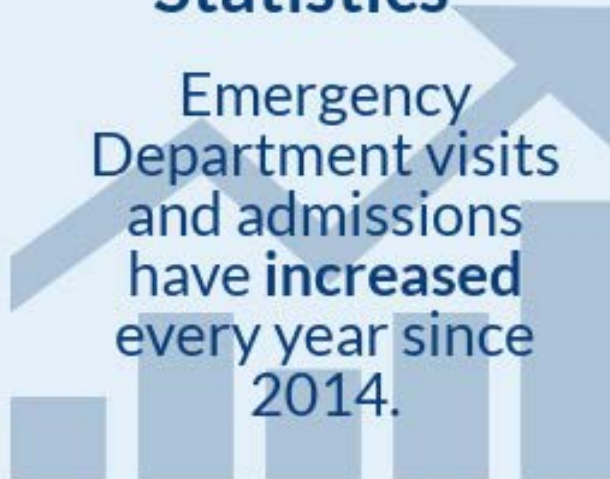

Charges increased for chronic conditions in the MHS PSAs by **21.6%** while cases only increased by **1.6%**.

Service Area Statistics

In 2016, PSA 33024 had the most cases of chronic conditions while **33023** had the highest charges.

Emergency Department Statistics

Emergency Department visits and admissions have **increased** every year since 2014.

In 2016, SSA 33147 (Miami-Dade zip code) had the most cases of chronic conditions while **33311** had the highest charges.

Avoidable Hospital Visits

Visits classified as [84]-problems that are high in severity but do not pose an immediate threat to life had both the highest cases and charges in 2016

Payer Source

[81] and [82] cases- Medicaid
 [83] and [84] cases- Private
 [85] cases- Medicare

Age Group

0-17

18-39

40-64

Visit Classification [81] and [82] cases

[83] cases

[84] and [85] cases

PQIs

The most PQI cases were for **COPD** (including adult asthma) and the highest charges were for **low birth weight (LBW)**.

Medicare paid the greatest proportion of charges for most of the PQIs except for *short term diabetes and low birth weight (Medicaid)* and *perforated appendicitis (Private)*.

Whites had the most cases for most of the PQIs except for *Hypertension (Blacks)* and *low birth weight (Other)*.

Memorial Regional Hospital had the highest number of **LBW** cases out of the MHS hospitals.

Zip Code **33023** (West Park) had the highest number of **LBW** cases

DRGs

Delivery had the highest number of discharges while **general surgery** had the highest charges in 2016.

Thoracic surgery had the greatest discharge to charge difference with 772 discharges accounting for over \$407 million.

Access to Care

- Implementation of a care coordination and transitional care program
- Consideration for diversity issues (i.e.: languages spoken, undocumented populations)
- Assistance with navigation of the health insurance system including **legal-medical partnerships**
- Continued education of the underinsured/uninsured about new MHS Primary Care sites **including collaboration/partnerships to ensure widespread information-sharing.**

Preventive Care

- Prenatal Care for the prevention of low birthweight and other negative health outcomes
- Immunizations
- Education for the prevention of opioid use.
- **Educate providers to screen youth for adverse experiences (using the ACE survey) in order to link to appropriate services early**

Community Health Education

- Chronic disease self-management (Congestive Health Failure, Diabetes, Chronic Obstructive Pulmonary Disease, Asthma)
- Health promotion and wellness
- Education for the prevention of sexually transmitted infections

Quality of Care

- Consideration for diversity issues including languages spoken, patients with disabilities, gender issues (**i.e. gender identity, gender expression and sexual orientation**)
- **Diversification and training of clinical and non-clinical staff**
- Coordination of care
- **Consideration for the impact of macro-conditions (i.e. systemic racism) on population health**

Emergency Response

- Design and implementation of an all hazard regional response and recovery system
- Education of first responders through simulation

Introduction

What is a Community Health Needs Assessment?

A dynamic process involving multiple sectors of the community

Draw upon qualitative and quantitative population health status data

Identify unmet community needs to improve the health of vulnerable populations: the poor, homeless and disenfranchised

Enable community-wide establishment of health priorities

Why do a Needs Assessment?

Affordable Care Act

Section 501(r)(3) requires a community health needs assessment (CHNA) at every three years

An implementation strategy to meet the community health needs identified through the CHNA

JCAHO Standards

The needs of the community must guide service delivery

IRS Form 990 Requirement

Manner in which community information and health care needs are assessed

Opportunity

Identify unmet community needs to improve the health of vulnerable populations

Improve coordination of hospital with other efforts to improve community health

IRS Requirement for CHNA

Community served by the hospital.

Process and methods used to conduct the assessment, including list of all of the **collaborating organizations**.

A description of how the hospital took into account **input from persons** who represent the broad interests of the community.

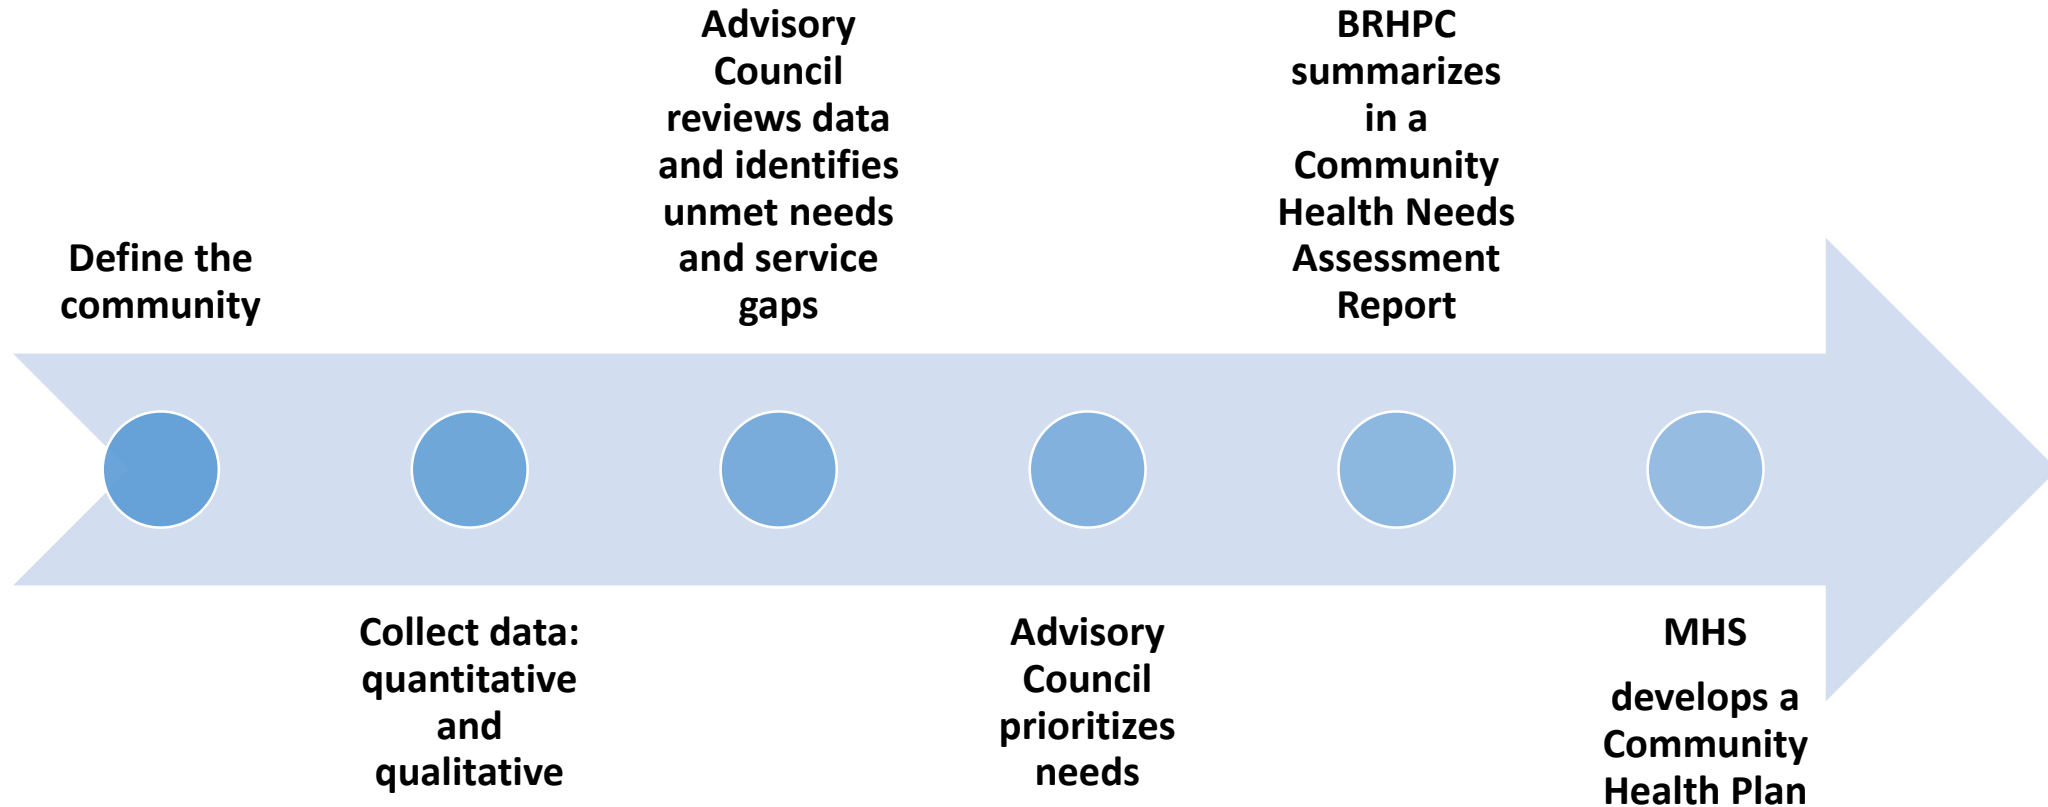

A **prioritized** description of all of the community health needs identified through the CHNA.

A description of the **existing resources available** to meet the community health needs identified.

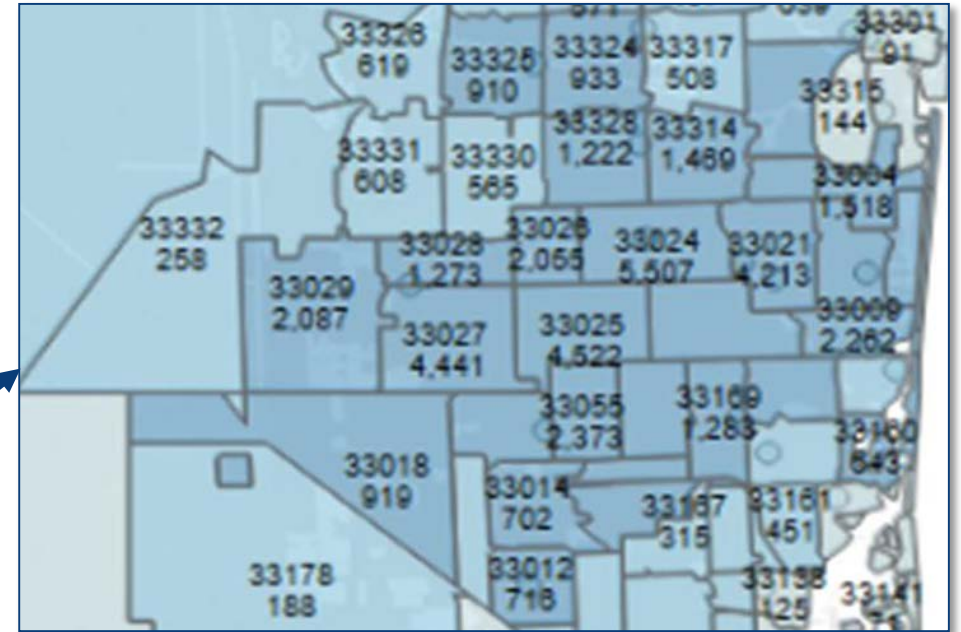

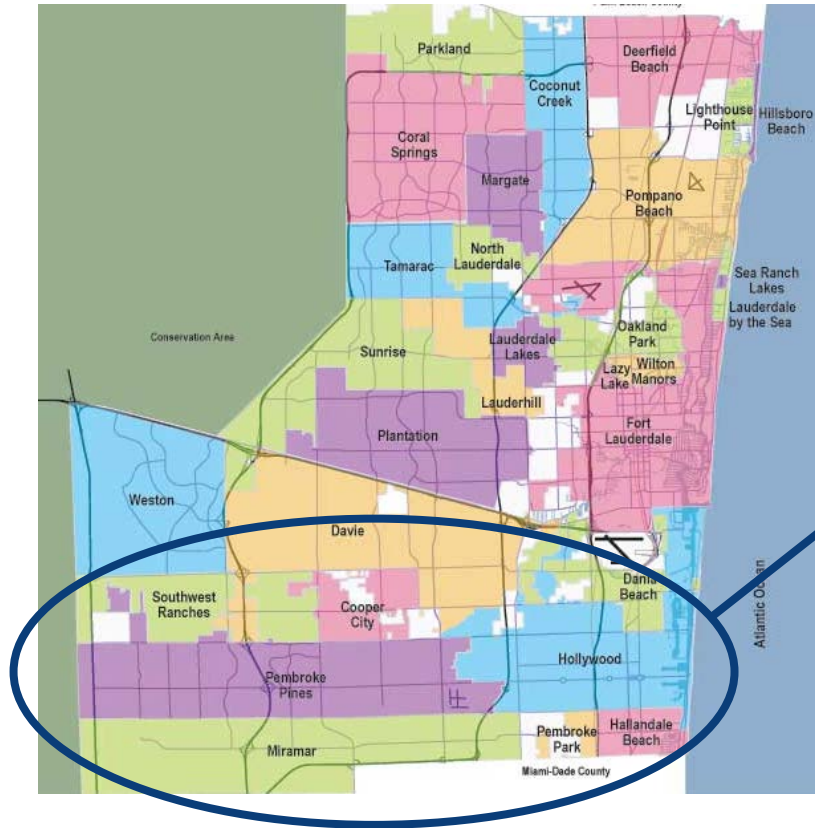

A vertical decorative bar on the left side of the slide, featuring a grey background and a series of seven hexagons. The hexagons are arranged in a staggered pattern and are colored in shades of blue and grey, with the top two being light blue, the middle two being dark blue, and the bottom three being grey.

Florida Kidcare

Florida KidCare is the State of Florida's high-quality, low-cost health insurance for children. The program was created through **Title XXI of the Social Security Act** and reauthorized in 2009. Through its four partners, including Florida Healthy Kids, the program covers children from birth through age 18:

The Florida Healthy Kids Corporation

- Administers the Florida Healthy Kids program for children ages 5 through 18.
- Determines eligibility for the non-Medicaid parts of the program.
- Collects monthly premiums.
- Manages the Florida KidCare customer service call center.

The Agency for Health Care Administration

- Administers Medicaid services.
- Administers MediKids program for children ages 1 through 4.
- Works with the federal government to make sure the Florida KidCare program follows all federal laws and rules.

The Department of Children and Families

- Determines eligibility for the Medicaid program.
- Administers the Behavioral Health Network for children ages 5 through 18 with serious emotional disturbances.

The Department of Health

- Administers the Children's Medical Services Managed Care Plan (CMS) for children with special health care needs from birth through age 18.
- Chairs Florida KidCare Coordinating Council
- Currently, more than 2.4 million Florida children are enrolled in Florida KidCare.

Children's Health Insurance Program (CHIP)

Health coverage to 9 million children from lower-income households that make too much money to qualify for Medicaid.

Its federal authorization ended Oct. 1, and states were then forced to use unspent funds to carry them over, while the House and Senate try to agree on a way to continue funding.

The \$2.85 billion Congress allocated in December was supposed to fund CHIP programs in all states through March 31. But federal health officials say it won't stretch that far.

CMS says the agency is in discussions with states to help deal with the funding shortfall.
Florida is one of them.

Health Care Resources

Medically Underserved Areas/Populations

- Every year the U.S. Health Resources and Services Administration examines areas or populations that are experiencing a shortage of healthcare professionals. The following definitions are used to make the determination:
- **Medically Underserved Areas** may be a whole county or group of contiguous counties, a group of county or civil divisions or a group of urban census tract in which residents have a shortage of personal health services.
- **Medically Underserved Populations** may include groups of persons who face economic, cultural or linguistic barriers to healthcare.

Medically Underserved Area/Population Scoring Criteria

- Eligibility for MUA/P designation depends on the Index of Medical Underservice (IMU) calculated for the area or population proposed for designation.
- IMU of 62.0 or below qualifies for designation as an MUA/P.
 - The IMU scale is from 0 to 100, where 0 represents completely underserved and 100 represents best served or least underserved.
 - The IMU is calculated by assigning a weighted value to **an area or population's performance on four demographic and health indicators**, then adding the weighted values together.

Broward County Medically Underserved Area/Populations

Medically Underserved Area/Populations All Low Income, representing 104 Census Tracts	MUA/MUP Score
Dania	50.4
Deerfield Beach	44.3

Pompano Beach	60.4
Sunrise	41.8

Health Professional Shortage Areas

- Health Professional Shortage Areas (HPSAs) are geographic areas, demographic population groups (such as low income or homeless) or institutions (medical or other public facilities) with a shortage in health care professionals.
- The HRSA Bureau of Health Professionals designates three HPSA provider categories: primary medical care, dental health and mental health.

Health Professional Shortage Area scoring criteria and FTE formula

Primary Care HPSA Scoring

Dental Health HPSA Scoring

Mental Health HPSA Scoring

What is Shortage Designation? Geographic areas, populations, and facilities with too few primary care, dental and mental health providers and services. HRSA works with state partners through an application process to determine which should be “shortage designations,” and are therefore eligible to receive certain federal resources.

NSC = Nearest source of care outside the HPSA designation.

OB/GYN Deserts-Broward County

Maternal Child Health Strategies

Black Infant Health Practice Initiative (BIHPI):

- Reducing disparities and increasing health and birth equity outcomes

Breastfeeding Coalition of Broward County:

- Increasing the rates of initiation and duration of breastfeeding

Healthy Babies are Worth the Wait[®]:

- Reducing the rates of preterm births

Infant Health Maternal Depression:

- Increasing access to and receipt of treatment for mothers with postpartum depression

Infant Health Safe Sleep:

- Reducing the rates of infant deaths due to unsafe sleep practices

Maternal Child Health Strategies (cont.)

Infant Health Safe Sleep:

- Reducing the rates of infant deaths due to unsafe sleep practices

Infant Health Substance Exposed Newborns:

- Decreasing the rates of infants born exposed to addictive substances and increasing access to treatment and services for mothers with substance use conditions

Maternal Health:

- Reducing the rates of Cesarean sections and elective deliveries and reducing rates of maternal morbidity, such as hypertension, diabetes, obesity, and social determinants of health that affect birth outcomes

Perinatal HIV:

- Reducing the rates of maternal to infant HIV transmission and reducing the rates of congenital syphilis

Teen Parent Alliance:

- reducing the rates of teen births and repeat teen births

2-Year Old Immunization Rates, Broward & Florida, 2012-2016

HP 2020: 90% Achieve and maintain effective vaccination coverage levels for universally recommended vaccines among young children

Kindergarten Immunization Rates, Broward & Florida, 2013-2017

HP 2020: 95% Maintain vaccination coverage levels for children in kindergarten

Immunization Strategies

Florida Department of Health in Broward County The Shots by Two Program:

- Aims to increase the number of children who receive their immunizations, by mailing parents a reminder whenever a child is due for a vaccine.

Free Back to School Immunizations

- Mobile Units, Health Fairs, Community Events

Years of Potential Life Lost - Definition

An estimate of the average years a person would have lived if he or she had not died prematurely.

A measure of premature mortality.

As an alternative to death rates, it is a method that gives more weight to deaths that occur among younger people.

Years of Potential Life Lost per 100,000 Under 75, Broward, 2014-2016

What's included in data

Unintentional injuries

Definition

Injury not intended as self-harm or as intentional harm to another person

Why do we measure this?

An injury is damage to your body. It is a general term that refers to harm caused by accidents, falls, blows, burns, weapons and more. In the U.S., millions of people injure themselves every year. Injury mortality rate reflects the health and well-being of the population as well as the quality of the health care available. Injury mortality information is used by local governments and organizations to identify areas in need and designate available resources.

ICD-10 Code(s): V01-X59, Y85-Y86

Unintentional Poisoning

Definition

Poisoning by external causes such as drugs, medicaments and biological substances

Why do we measure this?

Deaths by poisoning is poisoning by external causes such as drugs, medicaments and biological substances. Poisoning mortality rate reflects the health and well-being of the population as well as the quality of the health care available. Poisoning mortality information is used by local governments and organizations to identify areas in need and designate available resources.

ICD-10 Code(s): X40-X49

Community Health Programs

Memorial HITS Program

- Program helps patients establish a “medical home”. The program encourages individuals with chronic health conditions to participate in disease management programs, and it provides enrollment assistance for governmental programs.

Florida Department of Health in Broward County

- Clinical and nutrition services, drowning prevention, tobacco prevention, environmental health, infectious disease.

Federally Qualified Health Centers

- Adult and pediatric clinical services, women’s health, chronic disease management, smoking cessation, prescription assistance,.

Broward Regional Health Planning Council

- The TOUCH program is recognized in South Broward in terms of the Healthy Community Zones established in Dania Beach and Hallandale Beach, the Dania Beach PATCH (People’s Access to Community Horticulture) urban farm and market and the AARP livable city initiative in Hallandale Beach. These initiatives are supported by the respective cities and are expected to continue throughout the next three (3) to five (5) years.

Community Providers

- 211 Broward First Call for Help

Community Health Programs

Broward County

- The Ryan White HIV/AIDS Program is a comprehensive system of care designed specifically for people living with HIV. The system of care includes primary medical care and essential support services for people who are uninsured or underinsured. Broward County is the recipient for Part A federal funds (including Formula, Supplemental and Minority Aids Initiative dollars).

Florida Department of Health in Broward County

- Infectious disease surveillance.
- HIV Routine Testing in the health care setting and targeted testing in non-healthcare settings; Pre-Exposure Prophylaxis and Post-Exposure Prophylaxis; Test and Treat (T&T), and community outreach.
- STD clinical services through a contract with the AIDS Healthcare Foundation (AHF).

Federally Qualified Health Centers

- HIV/AIDS testing, counseling and treatment, women's health.

Broward Regional Health Planning Council

- HIV Planning Council, Housing Opportunities for Persons with AIDS, AIDS Drug Assistance Program, Centralized Intake & Eligibility Determination, and Health Insurance Continuation Program.

Community Providers

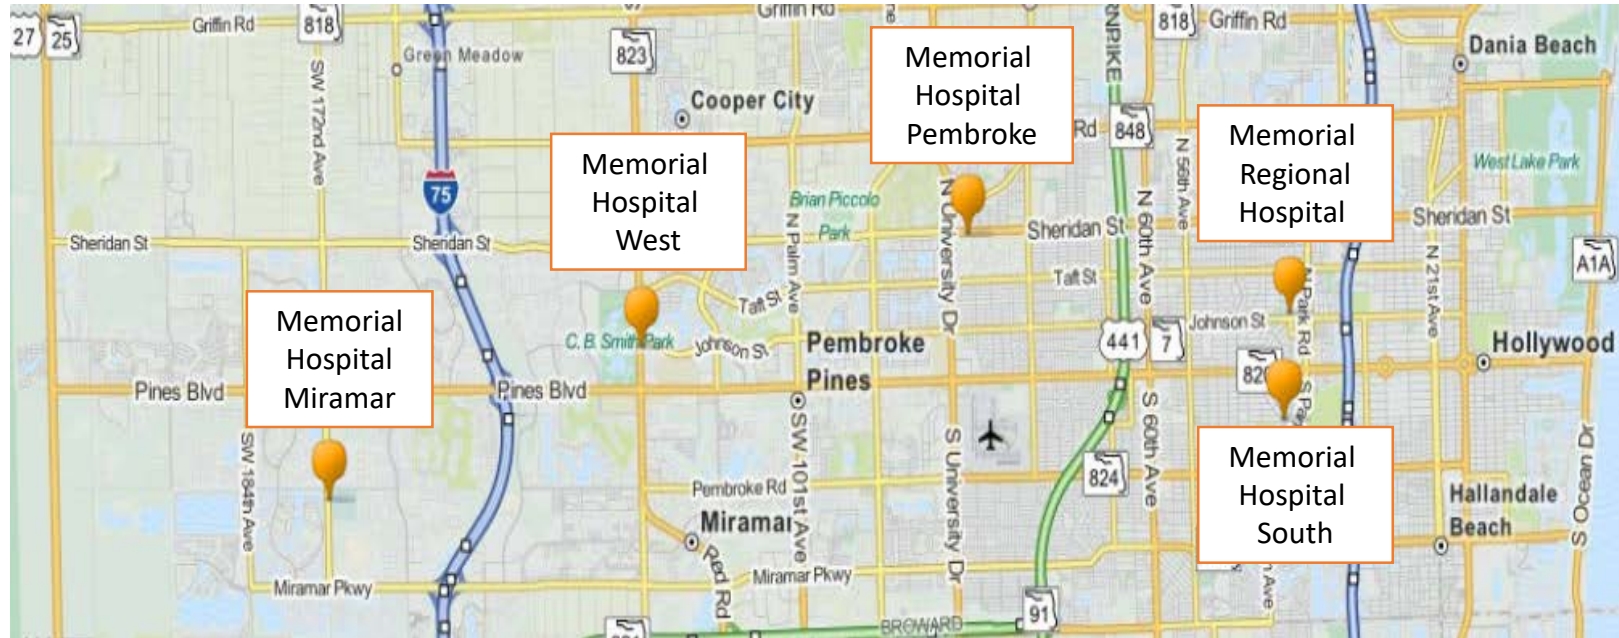

- 211 Broward First Call for Help.

Chronic Disease Hospitalization

Morbidity: Chronic Diseases

Chronic diseases have a long course of illness

Account for 7 out of 10 deaths in America

Major impact on quality of life of nearly 90 million Americans

- Disabling conditions
- Limited mobility
- Costly healthcare

Most chronic conditions can be prevented through lifestyle changes and access to health care

Chronic Disease Hospitalization

Hospital data can be used:

To assess trends and geographic variations in the occurrence of selected chronic diseases.

To monitor the impact of prevention and disease management programs.

Chronic Condition Indicator Tool

Developed as part of the Healthcare Cost and Utilization Project

Stratifies chronic diseases based on ICD-9-CM diagnosis codes

Based on All five-digit ICD-9-CM diagnosis codes, excluding external cause of injury codes

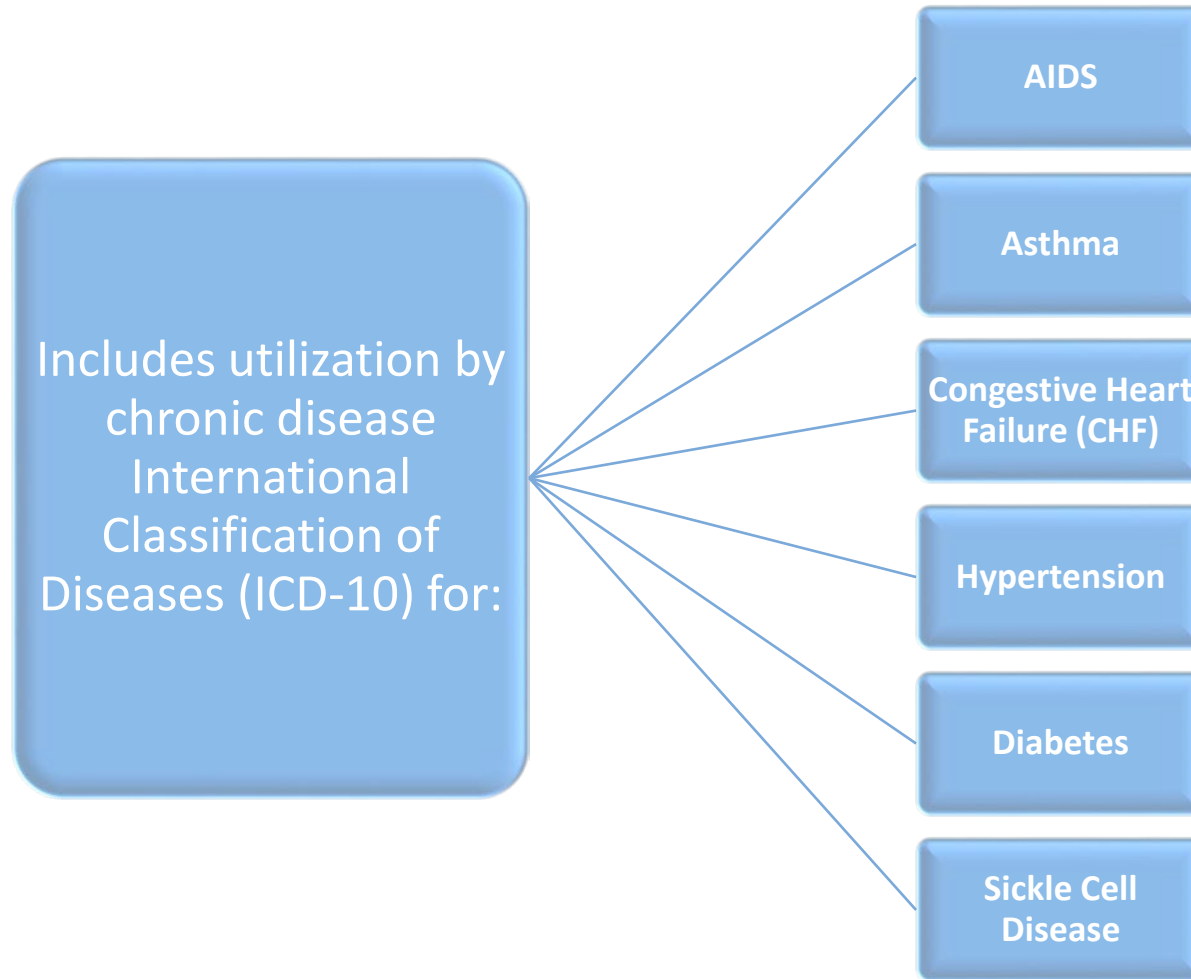

A chronic condition is a condition lasting 12 months or longer and meeting one or both of the following tests

Limitations on self-care and independent living

Results in need for ongoing intervention with medical products, services and special equipment

MHS Avoidable Emergency Department Visits

Avoidable Emergency Department Visits

The Emergency Department (ED) avoidable visit data is based on the New York University Emergency Department (ED) Algorithm for ED classification, created by a panel of ED and primary care physicians. The ED visits are stratified by emergency status:

- Non-Emergent (NonEm) – The patient’s initial complaint, symptoms, medical history and age indicated that immediate medical care was not required within 12 hours.
- Emergent/Primary Care Treatable (EmPCT) – Treatment was required within 12 hours; however, the care could have been provided effectively in a primary care setting. [All resources used are also available in a primary care setting.]
- Emergent – ED Care Needed – Preventable/Avoidable (EmPrev) – ED care was required; however, the emergency could have been prevented or avoided if ambulatory care had been given at the proper time.
- Emergent – ED Care Needed – Not Preventable/Avoidable (EmNonPrev) – ED care was required and ambulatory care treatment could not have prevented the condition.

Avoidable ED Visits, Cases by Emergency Status and Hospital- 2016

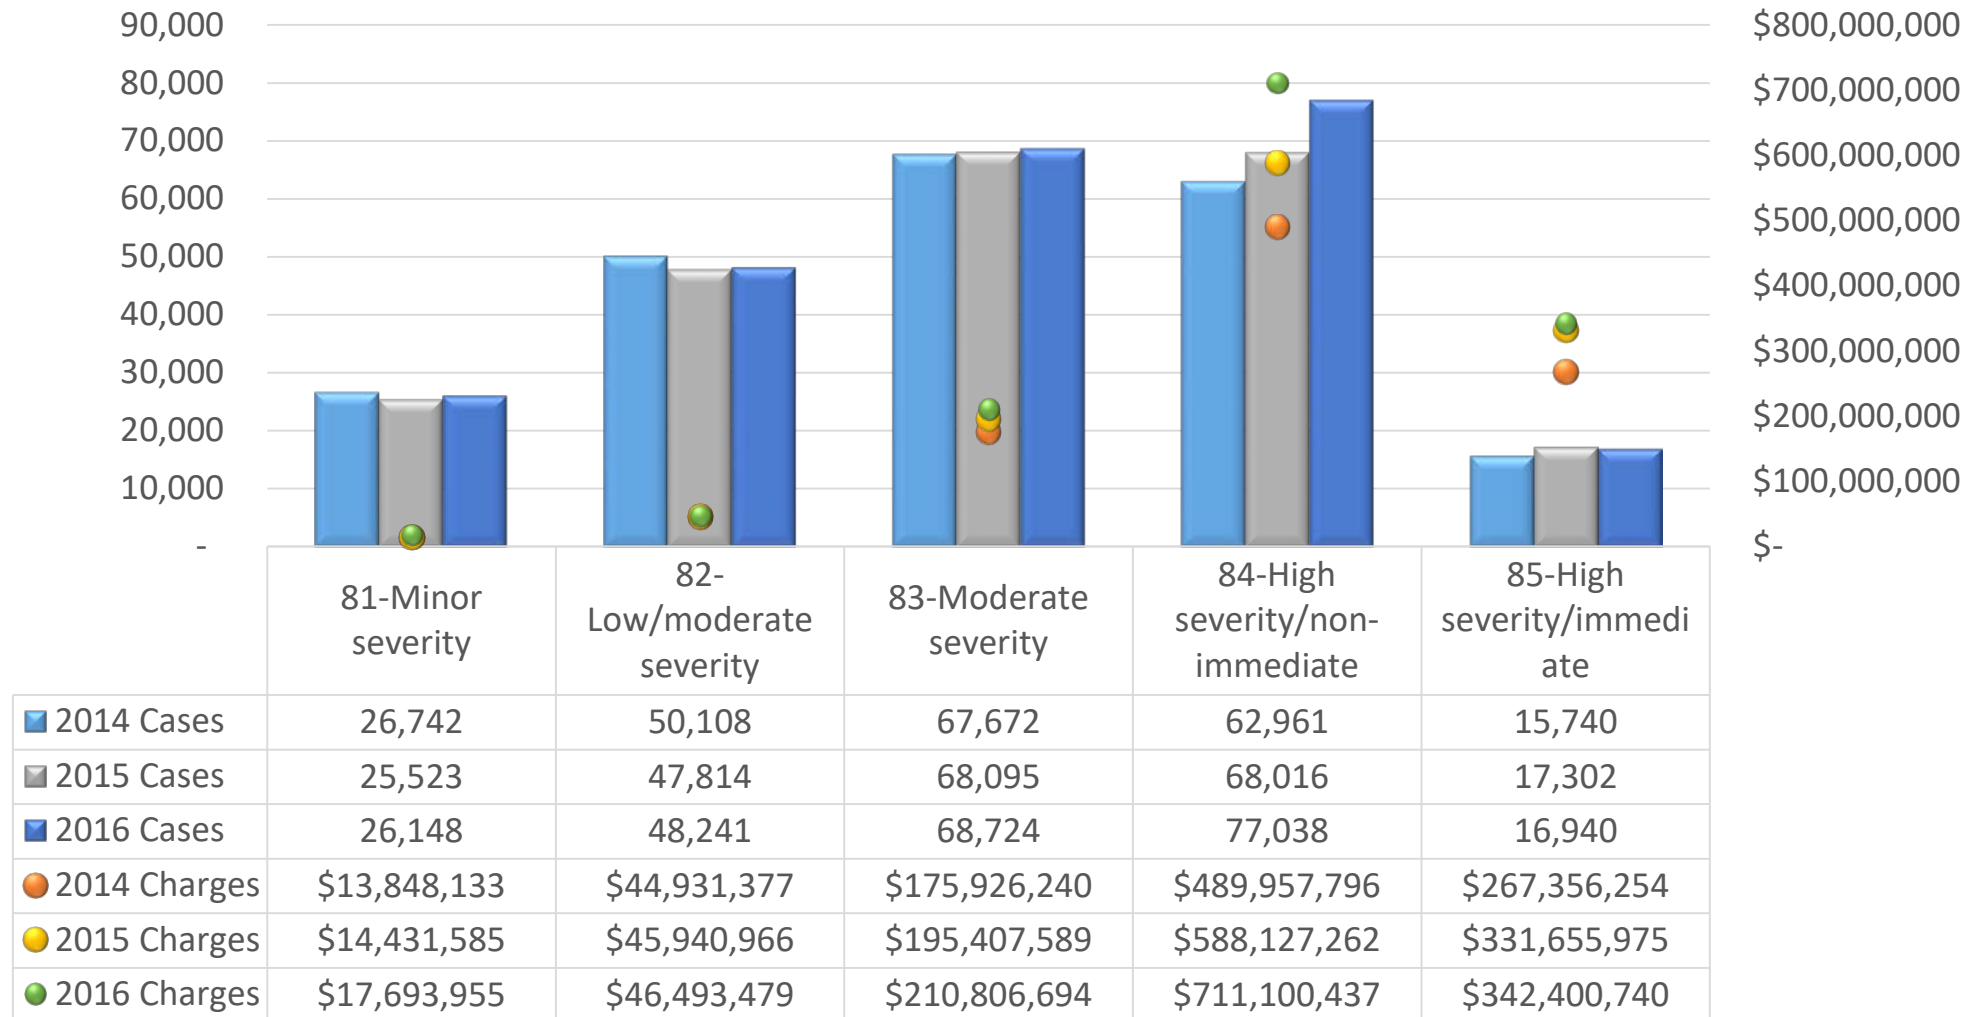

Source: Broward Regional Health Planning Council, Health Data Warehouse

Avoidable Emergency Department Visits

The Hospital Emergency Department Preventable/Avoidable visit data includes information on patient demographics, payer, and charges. Also, there is information on the acuity level of the patient at the time of admission to the ED which is based on the Current Procedural Terminology (CPT) Evaluation and Management code. The acuity grouping is as follows:

- [81] Minor – problems are self-limited or of minor severity
- [82] Low/Moderate – problems are low to moderate severity
- [83] Moderate – problems are of moderate severity
- [84] High/Not-immediate – problems are of high severity but do not pose an immediate significant threat to life
- [85] High/Immediate – problems are of high severity and pose an immediate threat to life

Prevention Quality Indicators

International Classification of Diseases, (ICD-10) Transition - Background

- The Department of Health and Human Services (HHS) has mandated that all entities covered by the [Health Insurance Portability and Accountability Act](#) (HIPAA) must all transition to a new set of codes for electronic health care transactions on **October 1, 2015**.
- World Health Organization (WHO) authorized the publication of the International Classification of Diseases 10th Revision (ICD-10), which was implemented for mortality coding and classification from death certificates in the U.S. in 1999.
- The U.S. developed a Clinical Modification (ICD-10-CM) for medical diagnoses based on WHO's ICD-10 and CMS developed a new Procedure Coding System (ICD-10-PCS) for inpatient procedures. ICD-10-CM replaces ICD-9-CM, volumes 1 and 2, and ICD-10-PCS replaces ICD-9-CM, volume 3.

Code set differences

- There are nearly 19 times as many procedure codes in ICD-10-PCS than in ICD-9-CM volume 3
- There are nearly 5 times as many diagnosis codes in ICD-10-CM than in ICD-9-CM
- ICD-10 has alphanumeric categories instead of numeric ones
- The order of some chapters have changed, some titles have been renamed, and conditions have been grouped differently

Prevention Quality Indicators

Impact of ICD-10 Coding Changes

05 - Chronic obstructive PD	PQI definition was changed to: COPD or Asthma in older adults Data Warehouse has this updated definition as of 2015 Qtr 4 (ie ICD-10 codes) Before 2015 Qtr 4 the Data Warehouse was using the older definition of COPD.
10 - Dehydration	PQI definition was updated to include more cases via Secondary Diagnosis codes. Also hyperosmolality and/or hyponatremia, gastroenteritis, or acute kidney injury are included. Data Warehouse has this updated definition as of 2015 Qtr 4 (ie ICD-10 codes) Before 2015 Qtr 4 the Data Warehouse is using the older definition.
13 - Angina w/o procedure	Has been retired.
14 - Uncontrolled diabetes	These are examples of the yearly data comparison being impacted by the differences in ICD9 - ICD10 coding. This impact can be due to several factors such as: the crosswalk available when porting the PQI ICD9 definition, different coding practices due to ICD10's more detailed approach.

Prevention Quality Indicators

Prevention Quality Indicators (PQI) utilize the Agency for Healthcare Research and Quality PQI to identify hospital admissions that evidence suggests could have been avoided if people are linked to quality, preventative services and primary care centers.

The PQI's represent fourteen ambulatory care sensitive conditions:

- Diabetes Short-term Complications
- Perforated Appendicitis
- Diabetes Long-term Complications
- Chronic Obstructive Pulmonary Disease
- Hypertension
- Congestive Heart Failure
- Low Birth Weight
- Dehydration
- Bacterial Pneumonia
- Urinary Infections
- Angina Without Procedure
- Uncontrolled Diabetes
- Adult Asthma
- Extremity Amputations Among Patients With Diabetes

Diagnosis-Related Group

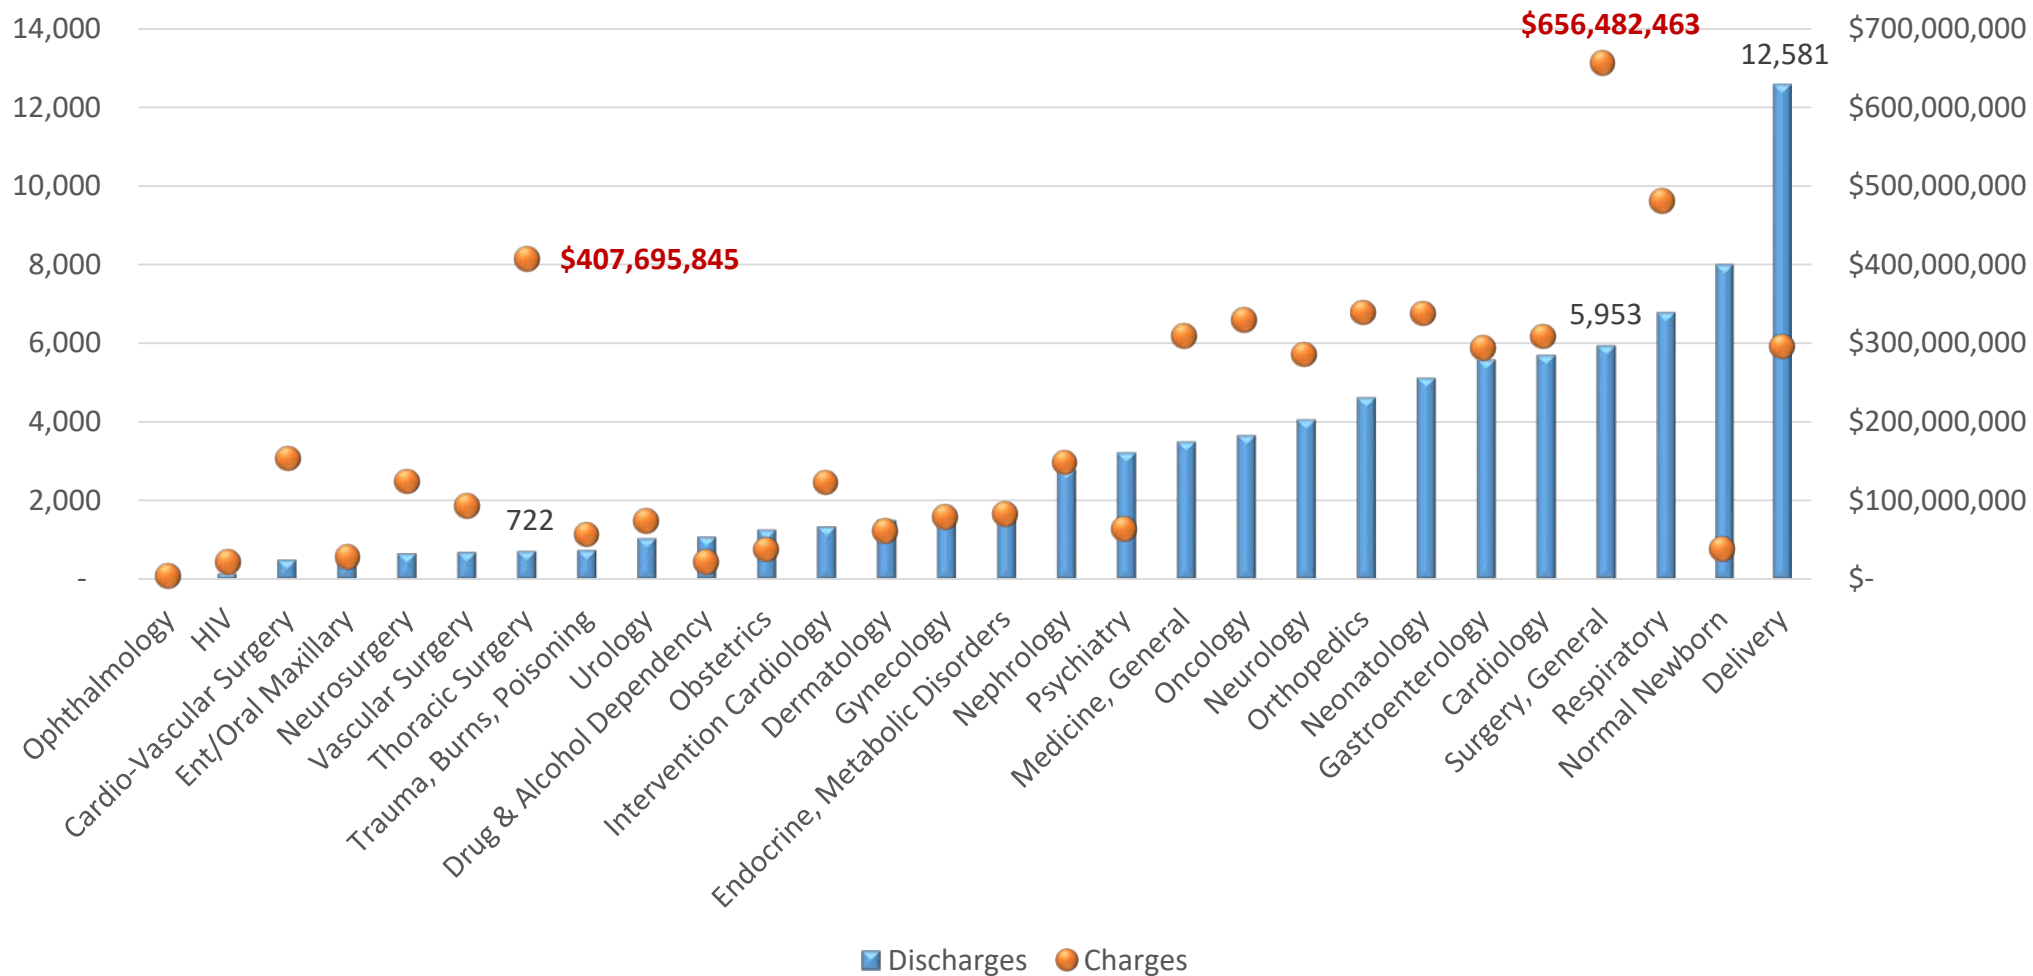

Diagnosis-Related Group

A system to classify hospital cases into one of approximately 500 groups, also referred to as DRGs, expected to have similar hospital resource use, developed for Medicare as part of the prospective payment system.

DRGs are assigned by a "grouper" program based on ICD diagnoses, procedures, age, sex, discharge status, and the presence of complications or co-morbidities.

DRGs have been used in the US since 1983 to determine how much Medicare pays the hospital, since patients within each category are similar clinically and are expected to use the same level of hospital resources.

Behavioral Health

Substance Abuse Statistics

- In 2017, there was a 30% rise in overdoses
- In 2016, 90% of the 582 accidental overdoses were due to opioid use
- Fentanyl is a synthetic painkiller which is 50x stronger than heroin and 100x stronger than morphine
- Fentanyl deaths in Broward increased from 44 in 2014 to 180 in 2016
- Cocaine deaths doubled in 2016 partially because of the act of combining prescription opioids with cocaine
- In FY 2016, 9,500 lbs of cocaine were seized in South Florida- a 61% increase from the previous year- primarily from Colombia

Brief History of Opioids in Florida

- **2010:** 90 of the 100 top oxycodone purchasing physicians were in FL with a significant number located in South Florida
- **2011:** Schedule II, III and IV prescriptions had to be reported to Florida's Prescription Drug Monitoring Program known as E-FORCSE
 - Purpose: to reduce the rate of inappropriate use of prescription drugs through education and safety efforts
- **2015:** Emergency Treatment and Recovery Act authorized the use of Naloxone to combat opioid overdosing
- **2016:** Due to decreased opioid availability users began to look to substitutes like heroin and Fentanyl
 - Currently, heroin has re-emerged as a serious health problem in Florida; particularly in the Tri-County area (Palm Beach, Broward and Miami-Dade)

Qualitative Data Profile

Broward Qualitative Data

Behavioral Risk Factor Surveillance Survey
(BRFSS)

Behavioral Risk Factor Surveillance Survey (BRFSS)

- The Behavioral Risk Factor Surveillance System (BRFSS) is the nation's premier system of health-related telephone surveys that collect state data about U.S. residents regarding their health-related risk behaviors, chronic health conditions, and use of preventive services.
- Established in 1984 with 15 states, BRFSS now collects data in all 50 states as well as the District of Columbia and three U.S. territories.
- BRFSS completes more than 400,000 adult interviews each year, making it the largest continuously conducted health survey system in the world.

Overall Health & Access to Health Services, 2016

Indicators	Broward County	Florida
Adults who could not see a doctor in past year due to cost	17.2	16.6
Adults who had a medical checkup in past year	73.2	76.5
Adults who have a personal doctor	72.7	72.0
Adults with any type of health care insurance coverage	85.6	83.7
Adults who had poor physical health on ≥ 14 of past 30 days	10.0	12.9
Adults who said overall health was "fair" or "poor"	14.3	19.5
Adults with "good" or "excellent" overall health	85.7	80.5
Adults who have seen a dentist in the past year	62.5	63.0

Cancer & Disability, 2016

Indicators	Broward County	Florida
Adults 50 years of age and older who received blood stool test in the past year	14.3	16.0
Adults ≥50 years of age who received sigmoidoscopy or colonoscopy in past five years	50.1	53.9
Adults ages ≥50 years who have ever had blood stool test	32.2	36.0
Adults ages ≥50 years who have ever had sigmoidoscopy or colonoscopy	68.7	69.2
Women ≥18 years of age who received Pap test in past year	54.7	48.4
Women ages ≥40 years who had a clinical breast exam in past year	62.3	60.8
Adults who are current smokers	11.5	15.5
Adults who are e-cigarette users	5.6	4.7
Adults who use special equipment because of a health problem	8.0	9.9

Heart Disease & Diabetes, 2016

Indicators	Broward County	Florida
Adults who have ever had angina, or coronary heart disease	2.6	4.7
Adults who have ever had a heart attack	3.3	5.2
Adults who have ever had a stroke	3.0	3.5
Adults with pre-diabetes	10.5	9.4
Adults with diagnosed diabetes	10.2	11.8

Mental Health & Alcohol Abuse, 2016

Indicators	Broward County	Florida
Adults who had poor mental health on ≥ 14 of past 30 days	11.9	11.4
Adults with good mental health for the past 30 days	88.1	88.6
Adults who have a depressive disorder	13.9	14.2
Adults whose poor physical or mental health kept them from doing usual activities ≥ 14 or of past 30 days	20.1	21.2
Adults who engage in heavy or binge drinking	18.8	17.5

Nutrition, Activity & Weight, 2016

Indicators	Broward County	Florida
Adults who are sedentary	23.9	29.8
Adults who are inactive or insufficiently active	58.4	56.7
Adults who are overweight	37.9	35.8
Adults who are obese	25.1	27.4

Broward Qualitative Data

Youth Risk Behavioral Surveillance Survey
(YRBSS)

Youth Risk Behavioral Surveillance Survey (YRBSS)

- The YRBSS includes national, state, territorial, tribal government, and local school-based surveys of representative samples of 9th through 12th grade students.
- Conducted every two years, usually during the spring semester.
- Data representative of mostly public high school students in each jurisdiction.
- All YRBSS questionnaires are self-administered, and students record their responses on a computer-scannable questionnaire booklet or answer sheet.

High School Student Alcohol & Substance Abuse- Broward, 2017

	2013	2015	2017

Made a plan about how they would attempt suicide during the 12 months before the survey	13.3%	15.4% (1991)
Attempted suicide one or more times during the 12 months before the survey	11.1%	6.1% (1991)

Qualitative Data

Professional Research Consultants- Community Health Needs Assessment

PRC Broward County CHNA, 2017

Project Goals

- Improve residents' health status, increase life span, elevate overall quality of life.
- Reduce health disparities among residents.
- Increase accessibility to preventive services for all community residents.

Methodology

- 200 residents each from South Broward and North Broward over the age of 18.

Focus Groups

Methodology

Community Focus Groups

- Five community focus groups were conducted
- Refreshments and gift cards were provided to the participants
- Each group lasted approximately 90 minutes
- The conversations were audio taped and transcribed
- Participants were assured that no names would be associated with the responses given
- Themes and negative/positive attributes were used to thread the responses when appropriate

Community Focus Group Questions

1. Can you describe the process you go through to get healthcare?
 2. Do you have any barriers? If yes, what are they?
 3. How would you describe the quality of care you receive when you are seen?
 4. When you are seen for medical care, how are you treated?
 5. How has health insurance impacted your healthcare?
 6. How do you think the delivery of health care services can be improved?
-

Community - Process to Obtain Healthcare

Reported Challenges/Areas of Need:

- Access to healthcare is difficult without insurance
- Difficulty with gathering documentation to get insurance
- Obtaining health care without insurance is too costly
- Long wait to obtain MHS Primary Care Card
- Forgetting a referral form may lead to a rescheduled appointment which is trying for the patient
- Long process to get government-based insurance
- Discharge papers should include referral for housing

Reported Areas of Satisfaction:

- MHS Primary Care Card
- Health insurance facilitates the process
- Coverage through employer
- Medicaid
- Walk-in clinics
- Mobile clinics
- Health Fairs

Community - Process to Obtain Healthcare (cont.)

Quotes

- *“Calling the insurance company is the best way to access healthcare.”*
- *“I use the MHS primary care clinic because it’s easy and very good.”*
- *“The process sounds very easy but it’s not that easy in reality. Memorial is restricting more each day and they are asking you for so many documents for eligibility.”*
- *“I don’t go to the doctor because it’s too complicated to deal with the insurance requirements.”*

Community - Barriers to Accessing Healthcare

Coverage

- Lack of health insurance coverage
- Process is confusing and lengthy to apply for healthcare

Affordability

- Lack of funds to pay for medications, co-pays and deductibles

Knowledge

- Lack of knowledge with regard to services, eligibility, and navigation
- Lack of knowledgeable providers

Access to Care

- Shortage of specialist (sickle cell, nephrology) locally – less diversity among specialists
- Lack of access to transportation to get to doctors
- Immigration status: Undocumented or must be a resident for 5 years
- Eligibility criteria is rigorous – Bank documentation requirement is challenging
- Long wait to obtain MHS Primary Care Card (6 months)

Discrimination

- Based on race, language and age

Communication

- Limited bilingual clinical staff
- Lack of knowledgeable providers about how to navigate the system
- Information not consistent from one resource to another
- Limited time spent with the doctor to allow for questions
- Literacy issues (reading and writing)

Health Status

- Challenges with mental health issues make navigating healthcare difficult (anxiety, depression, hallucinations)
- Medication side-effects

Community - Barriers to Accessing Healthcare

Quotes

- *“I received inaccurate information from social service agencies. They sent me somewhere and I was not able to get the services I needed.”*
- *“The people at the front desk sometimes mistreat you. I changed doctors because of that.”*
- *“The cost of healthcare is a huge barrier.”*
- *“Race is an issue; people are not treated fairly.”*
- *“They ask for too much documentation to qualify for services.”*
- *“When insurance send things in the mail (or anything in the mail), I can’t read it or respond back—I can’t write”*

Community - Quality of Care

Reported Areas of Need and Concern:

- Inadequate amount of time spent with the doctor
- Referral process challenging due to provider resistance
- Long wait times for an appointment leading to more medical needs (3-6 months)
- Lack of understanding of impact of mental health on physical health

Reported Areas of Satisfaction:

- Very satisfied with MHS
- MHS's My Chart App well received
- Excellent care
- Very satisfied with MHS Cancer Center
- Parents report satisfaction with access to care after business hours
- Multilingual medical staff are appreciated

Community - Quality of Care

Quotes

- *“You wait 2 hours to spend 15 minutes with the doctor.”*
- *“I have to ask the assistant to answer my questions because the doctor gets frustrated with me when I ask.”*
- *“The best quality of care I got was when the doctor took the time to summarize the visit with me.”*
- *“I had a hospital experience that was excellent.”*
- *“All my doctors are on point”*

Community - Description of Treatment

Reported Areas of Need or Concern:

- Medical staff lacks understanding of various cultures
- Bedside manners and cultural sensitivity matter
- Some respondents reported looking for a doctor that is relatable
- Insurance is the main driver for care rather than care for the patient
- Long wait at the ER
- Hospital errors

Reported Areas of Satisfaction:

- Excellent care
- Enjoy the personal touch of being known by medical team
- Appreciate not being rushed by the doctor
- Good food at the hospital
- Support groups offered at facility are great
- Peer specialist, therapists and doctors are great

Community - Description of Treatment

Quotes

- *“It is difficult to communicate with the medical staff due to language barrier.”*
- *“Medical staff need to be trained to be more personable.”*
- *“It is a blessing that the staff at my doctor’s office know me by me name.”*
- *“As an admitted patient, you have to have a companion to pay attention to treatment because nurses make mistakes.”*
- *“I have no complaints about Memorial. They send you a survey and call you to see how things are when you are discharged.”*
- *“When you come here it’s just to get away and talk to your psychiatrist and not think about stuff you got on your mind but when someone that works here and approaches you in a negative way you go back.”*

Impact of Health Insurance on Healthcare

Reported Areas of Need and Concern:

- Lack of health insurance impacts access to care
- Premiums are cost-prohibitive / High co-pays
- Choosing between paying for care or paying for basic needs (food/shelter)
- Complex insurance system - Lack of education – Patients have to conduct their own research
- Obamacare - Ability to retain the doctors and specialists they previously had
- Restricted choice of primary/specialists that accept insurance
- No or limited access to some medications
- Hesitancy in seeking services or delaying care
- Forced to work to keep insurance
- Past due bills that end up in collections
- Insurance companies provide confusing/conflicting information

Reported Areas of Satisfaction:

- Health insurance promotes access to preventive care – Reminders for check-ups
- Affordability of medications (3-month supplies)
- Overall access to care
- Accessing transportation through insurance

Community - Impact of Health Insurance on Healthcare

Quotes

- *“I am alive today thanks to health insurance.”*
- *“It’s nerve-wrecking not having health insurance. When Obamacare started I had extra money and coverage.”*
- *“You have to be smarter than the system; you have to find out which insurance your doctor takes and choose the one they are on.”*

Community - Suggestions to Improve the Delivery of Care

Quality of Care

- Communication between EHRs
- Communication between providers and patients
- Customer service training

Access

- Provide navigation and referral assistance
- Improve access to preventative care, dental care, and vision care
- Increase access points for urgent care, free clinics and mobile stations
- Streamline processes for eligibility – simplify documentation requirement
- Decrease wait time at clinics and ED
- Address transportation barriers
- Access to more mental health services (including Case Management); not just for diagnoses
- Childcare is needed because a child cannot accompany an adult during therapy sessions

Cost

- Provide universal affordable health care
- Less expensive childcare

Community Education

- Educate people about healthcare insurance coverage and available social services
- More prevention education

Cultural Competency

- Provide interpreters
- Increase cultural competency training
- Racial equity training

Community - Suggestions to Improve the Delivery of Health Care

Quotes

- *“Give front desk staff classes on how to treat others, they are too cold.”*
- *“Itemize healthcare bill.”*
- *“The community needs patient advocates to help patients express their concerns and make sure they are heard.”*
- *“Simplify the guidelines to qualify for the MHS Primary Card; they are too harsh.”*
- *“We have to remember that medicine here is different than in our countries, we have to empower ourselves for our well-being and our needs.”*
- *“I need case management to help read for me and let me know about things out in the community”*

A vertical decorative bar on the left side of the slide, featuring a grey background with a series of overlapping hexagons in shades of blue and grey.

Methodology

Provider Focus Groups

- Three provider focus groups were conducted
- Refreshments were provided to the participants
- Each group lasted approximately 60 minutes
- Participants were assured that neither individuals nor agencies would be attributed to the responses given
- Themes and negative/positive attributes were used to thread the responses when appropriate

Provider Focus Groups

Dates	Target Area	Time	# of Participants
2/13/18	Maternal Child Health	9:30 am	15
2/26/18	Special Needs	9:00 am	8
3/8/18	Substance Abuse/Mental Health	12:30 pm	12

Provider Focus Group Questions

1. What do you perceive are the key issues for your clients to access healthcare?
 2. Do you experience any barriers as a provider? If yes, what are they?
 3. In your opinion, how would you describe the quality of care your clients receive?
 4. How do you perceive that your clients are treated when they are seen for treatment?
 5. How has health insurance impacted healthcare access for your clients?
 6. How do you think the delivery of health care services could be improved?
-

Providers - Key Issues Related to Clients' Access to Healthcare

- High cost of care / Lack of insurance
- Lack of understanding of **how** to access care – How to find the “front door”
- Complex eligibility process (technology poses a challenge for the elderly)
- Challenges navigating the system
- Challenges with health literacy and cultural barriers
- Challenges with transportation
- Lack of access to primary, specialty, vision and dental care (particularly difficult to find specialist who understand patients with special needs/substance abuse/mental health)
- Lack of knowledge about affordable, preventative care
- Access and support for substance abuse and mental health services
- Fear/Lack of trust due to immigration status

Providers - Key Issues Related to Clients' Access to Healthcare

Quotes

- *"Patients don't know how to apply for benefits."*
- *"Patients with special needs don't know where the front door is."*
- *"Immigration status plays a huge role in accessing healthcare."*
- *"Maneuvering the various eligibility processes is very tough."*

Provider - Barriers Encountered

Resources

- Getting undocumented patients connected to resources and funding
- Finding physicians within insurance network
- Lack of staff who understand health insurance
- Lack of provider understanding of local programs
- Lack of stable housing options for client
- Long wait periods

Delay/Avoidance of Care

- Lack of client trust due to fear of deportation
- Stigma associated with Substance Abuse/Mental Health

Access to Care

- Special needs services mostly available in North Broward → transportation issue
- Transitional care from childhood to adulthood
- Long wait to obtain psychotropic medication → client decompensation

Communication

- Literacy
- Consumers do not understand the application process
- Language and cultural differences

Coverage

- High cost for healthcare coverage
- Many clients do not have employer-based coverage

Provider - Barriers Encountered

Quotes

- *“Clients face stigma attached with receiving behavioral health services”*
- *“Patients don’t understand how Medicaid works.”*
- *“The wheels of government turn slowly; it’s hard to mobilize a quick response.”*
- *“It’s hard to find behavioral health providers for 0-5 population.”*
- *“If a client is unemployed, it’s hard to connect him with healthcare.”*
- *“Doctors are not aware of community services and don’t guide patients appropriately.”*
- *“Patients are hiding due to the political situation.”*

Provider - Quality of Healthcare Clients Receive

Reported Areas of Need and Concern:

- Dismissive attitude regarding patient feedback about medication side effects
- Discharge planning to prevent recidivism
- Medical staff lack knowledge about special needs population (individuals with disabilities/SAMH/deaf and hard of hearing)
- Lack of early intervention during 0-5 years phase
- Increased pressure on physicians due to high volume
- Language and transportation are barriers
- Race/implicit bias impacts quality of care

Reported Areas of Satisfaction:

- Provider perseverance despite numerous barriers
- Good continuity of care but follow up is key

Provider - Quality of Healthcare Clients Receive

Quotes

- *“Patients receive great care in the hospital but the medical staff need to ensure that patients are connected to services upon discharge.”*
- *“Housing is an issue.”*
- *“Socioeconomic status defines the kind of care you receive.”*
- *“Providers are not equipped to serve patients who are deaf and pregnant – a major gap in services.”*

Provider - Perception of Treatment

Reported Areas of Need and Concern:

- Socioeconomic status (SES) defines the way patient is treated:
 - Better SES → better care → more access to technology
- Front office staff is a reflection of the leadership in terms of customer service
- Some clients report that they feel like a number → need to feel listened to
- Stigmatized → overall lack of trust of traditional doctors
- Language barriers
- Issues related to low literacy levels

Reported Areas of Satisfaction:

- Positive feedback regarding patient treatment at MHS
- Patient advocates/care coordinators improve patient treatment
- Hard working staff to ensure positive experience

Provider - Perception of Treatment/Dignity in Treatment

Quotes

- *“Providers show great care for clients.”*
- *“In hospital, staff work hard to ensure a positive experience.”*
- *“Staff at the front desk need to be more culturally aware.”*

Provider - Impact of Health Insurance on Access

Affordability

- Lack of ability to prove income (bank documentation) leads to decreased access to affordable healthcare
- High co-pays/deductibles
- SAMH Clients can't afford health insurance → Medicaid or nothing

Navigation

- Lack of education on how to use insurance
- Navigators' inability to explain products to patients due to lack of knowledge
- Hard to find specialists that accept Medicaid
- Type of insurance can limit access → eligibility for certain procedures

Barriers

- Immigration status
- Documentation requirement too stringent, especially for clients with special needs
- Fear of losing coverage if income level increases

Provider - Impact of Health Insurance on Access

Quotes

- *“Health insurance is the primary factor in accessing care.”*
- *“Patients have to jump through hoops to get medication – especially those with special needs.”*
- *“Malpractice insurance impacts services.”*

Provider - Suggestions to Improve Delivery of Health Care Services

Staff Training

- Racial equity training
- Customer service improvement

Access

- Greater access to low cost/no cost preventive care
- Increase healthcare access points
- Consideration for social determinants of health impacting behavioral health and special needs populations
- Simplify documentation requirements for services

Education and Outreach

- Public education on insurance coverage in easy to understand language and multiple languages
- Culturally appropriate outreach → hire within local communities
- Use technological platforms to share information about resources → create an app, use text messaging, promote on social media

Provider - Suggestions to Improve Delivery of Health Care Services

Quotes

- *“Streamline the process to make it less bureaucratic.”*
- *“Doctors don’t know how to treat the opioid epidemic. They need special training to keep up with the trends.”*

A vertical decorative bar on the left side of the slide, featuring a grey background with a series of overlapping hexagons in shades of blue and grey. The hexagons are arranged in a staggered pattern, with some overlapping others. The colors transition from light blue at the top to dark blue in the middle, and then to grey at the bottom.

Key Informant Interviews

Methodology

- 30 Key Informants (KI) were selected.
- Response: 11 of the 30 key informants completed the interview (37% response rate).
- 5-item standardized, open-ended questionnaire was developed.
- Themes were used to thread the responses when appropriate.
- Frequencies and percentages of responses were recorded and qualitative summaries were produced.

Key Informant Interview Questions

1. What do you perceive are the key issues in healthcare?
2. What are the barriers?
3. What is the impact of healthcare on the community? Your agency?
4. How do you see the local healthcare system in five years?
5. If you could design the perfect healthcare system, what would it look like? What would be your agency's role?

What do you perceive are the key issues in healthcare?

Theme		Percent	Count
Affordability		100.0%	11
Access to care		54.5%	6
Continuity of care		36.4%	4
Specialty care		27.3%	3
Lack of insurance		63.6%	7
Other		9.1%	1

Insured costs in addition to the cost of coverage (copays, deductibles, etc)

What are the barriers?

Theme		Percent	Count
Affordability		100.0%	11
Lack of Insurance coverage		63.6%	7
Lack of Availability/Access quality service or sites		18.2%	2
Access to information		18.2%	2
Funding availability		45.5%	5
Language		9.1%	1
Transportation		18.2%	2
Other		9.1%	1

Restrictions on care imposed by insurance companies, additional costs like copays and deductibles

What is the impact of healthcare on the community?

Theme		Percent	Count
Increase or decrease productivity		45.5%	5
Increase or decrease quality of life and well-being		100.0%	11
Reduce the burden of the uninsured		54.5%	6
Educate the community about health and wellness		54.5%	6
Reduce the burden of disease		45.5%	5
Other		9.1%	1

Cost burden to insured to account for uninsured

Local Health System... in 5 Years

Number of Responses n = 11 (Percentage)		
Themes	Frequency of Mention	Quotes
Consolidation of services	3 (27%)	<i>"System wide Integration of primary, behavioral and oral health care services."</i>
More expensive healthcare system	2 (18%)	<i>"Cost will continue to escalate." "Unaffordable for most people."</i>
Emphasis on Prevention	2 (18%)	<i>"More preventive care delivered by health professionals other than medical doctors (nurses, etc.)"</i>
Access more difficult	2 (18%)	<i>"Greater difficulty in accessing healthcare and insurance."</i>
Movement toward outpatient care	1 (0.9%)	<i>"The healthcare system continue to change."</i>

The Ideal Health Care System

Number of Responses n = 11 (Percentage)		
Themes	Frequency of Mention	Quotes
Integration and Coordination of Healthcare Resources	3 (27%)	<i>"Healthcare resources would be coordinated and integrated. Chronic disease care management and coordination would be established at point of entry."</i>
Single Payor System	2 (18%)	<i>"Single payor system with sliding scale premiums...similar to Medicare."</i>
Prevention, Education and Health Promotion	2 (18%)	<i>"Health care would also encompass emotional health and address substance abuse."</i>
Continuity of Care	2 (18%)	<i>"Greater Continuity of care where a patient/client can receive comprehensive care across funding sources."</i>
Patient-owned EMR	1 (0.9%)	<i>"Everyone's electronic medical record would follow them through any healthcare system throughout the country."</i>
Universal Healthcare	1 (0.9%)	

Agency's Role

Number of Responses n = 8 (Percentage)		
Themes	Frequency of Mention	Quotes
Provider of Healthcare/Social Services	4 (36%)	<p><i>"To provide affordable Primary, behavioral and oral health service."</i></p> <p><i>"Providing comprehensive care."</i></p>
Planning Assessment and Coordination	2 (18%)	<i>"Facilitator of change."</i>
Employer	2 (18%)	<i>"Working with our families and employees to educate them as to the workings of the health care system."</i>

A vertical decorative bar on the left side of the slide, featuring a light gray background with a series of overlapping hexagons in various shades of blue and gray. The hexagons are arranged in a staggered pattern, with some overlapping others. The colors transition from light blue at the top to dark blue in the middle, and then to gray at the bottom.

Community Conversation

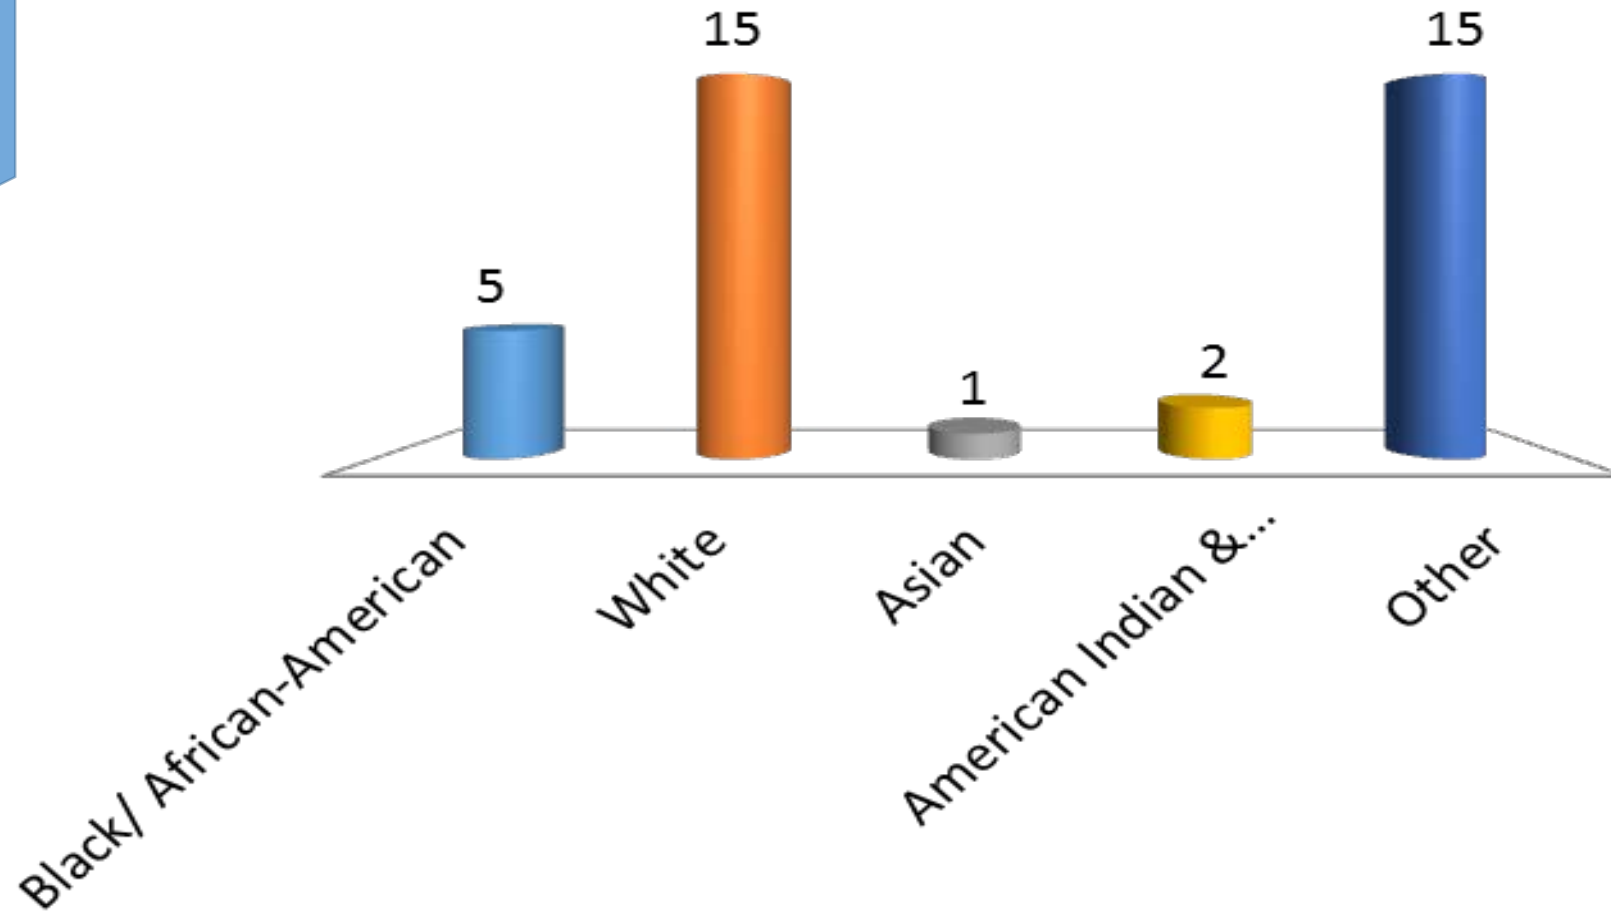

Methodology

- Total of 38 participants attended the events
- The audience was given an introduction of the community needs assessment process and a description of the purpose of the event
- Questions were presented to the audience for discussion
 - Index cards were provided for participants to write comments or questions
 - Open microphone for comments
 - Responses were documented
 - Interpreters were present for Spanish and Haitian Creole speakers
- Using the online voting system, the participants' top ten needs and concerns were preloaded as questions
- Instant voting results were presented
- Healthcare access questions were addressed
- Community resources were provided

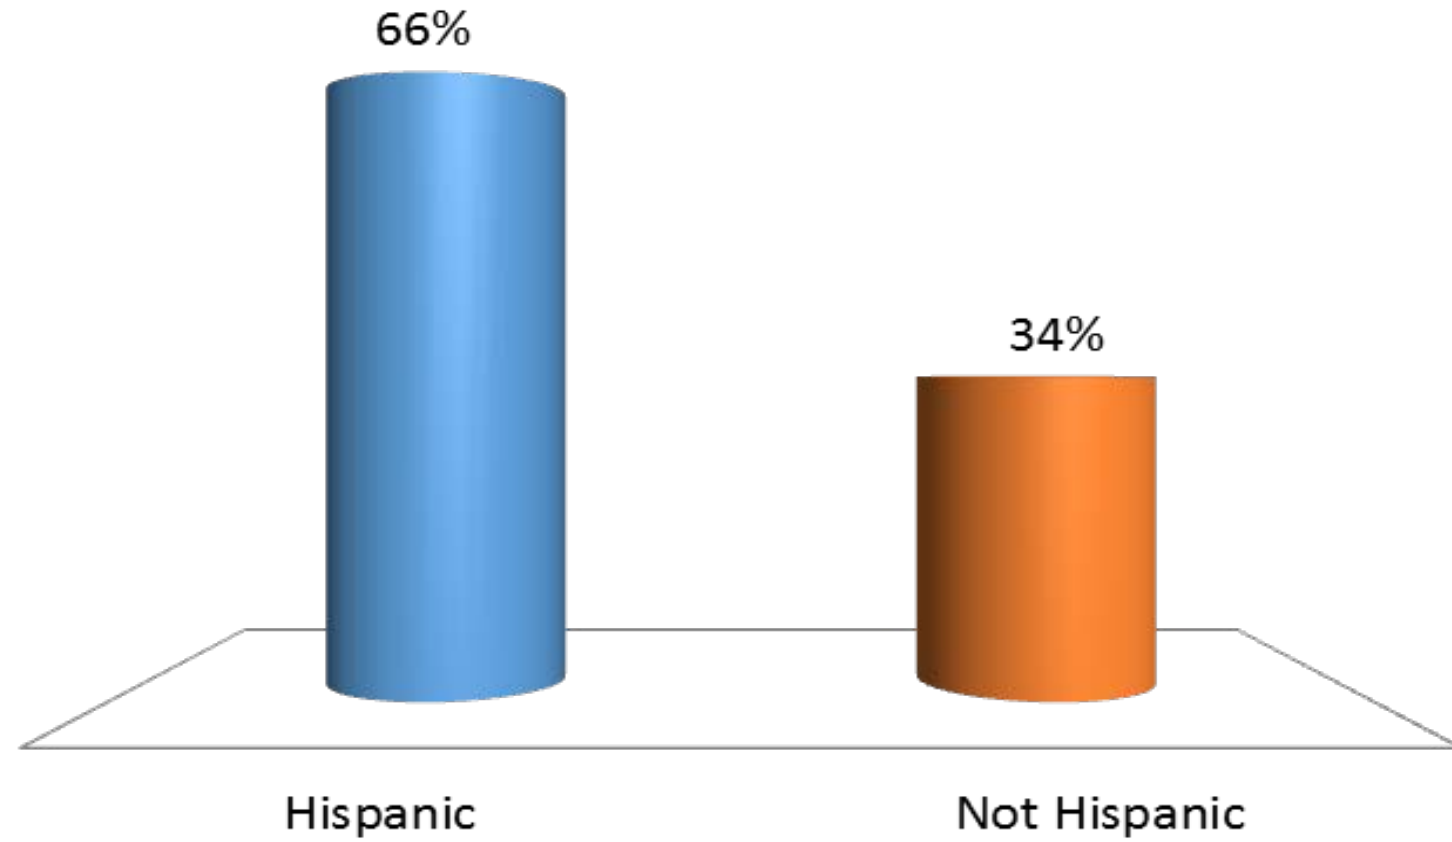

What is your gender?

What race do you identify yourself as?

What is your ethnicity?

What is your age group?

Do you have any children?

Have you been to the doctor in the last year?

Rate your overall health status

Do you feel you understand your health insurance benefits?

Do you feel you have reasonable access to transportation?

How important is it for you to understand your health benefits?

How important is it for you to have good nutrition?

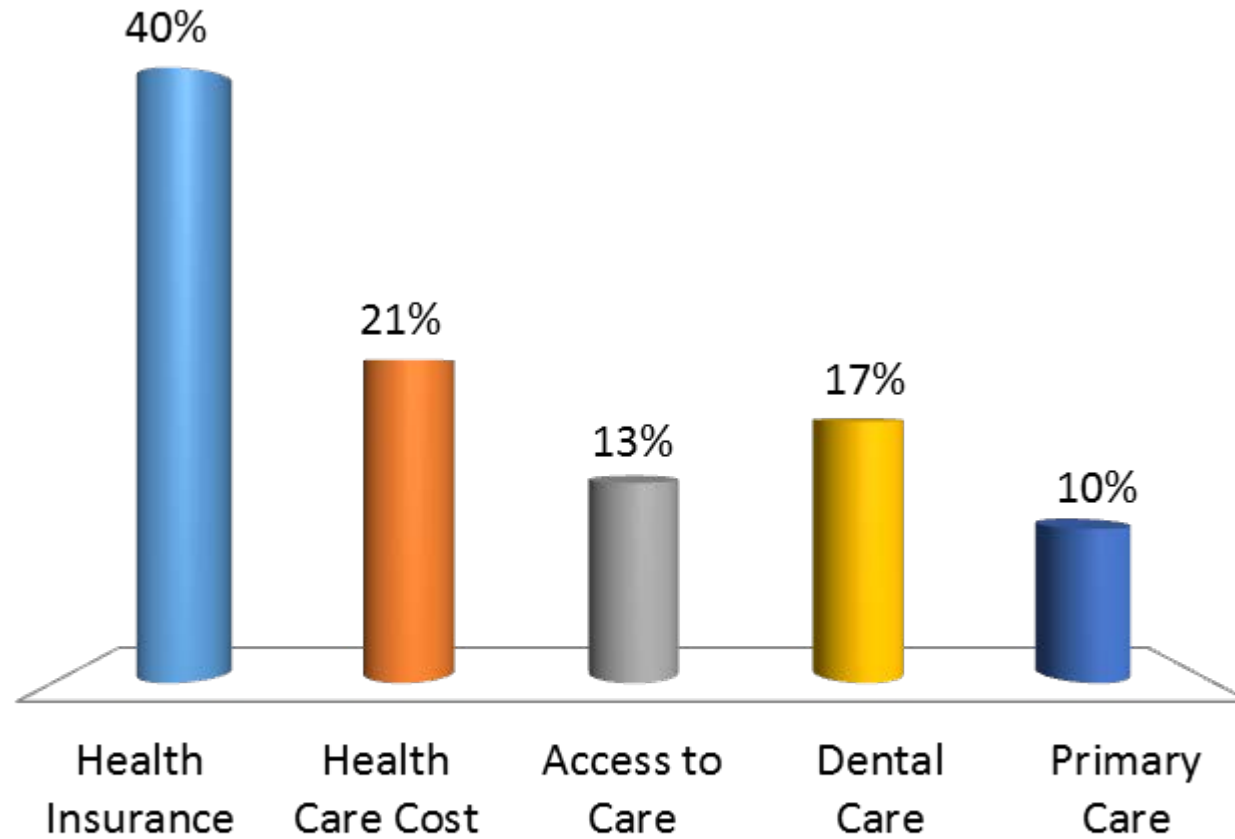

How important is it for the community to address the issue of Obesity?

How important is it for the community to address the issue of Substance Abuse?

Tell us your top healthcare need

Would you be interested in being an Ambassador to help Memorial spread the word of good health in the community?

Community Conversations Participant Feedback

- Participants enjoyed:
 - That the event was well presented and offered wealth of information about healthcare
 - Instant feedback on the questions presented on the screen
 - Receiving healthcare access information (e.g., clinics, locations, resources)
 - The opportunity to express their needs

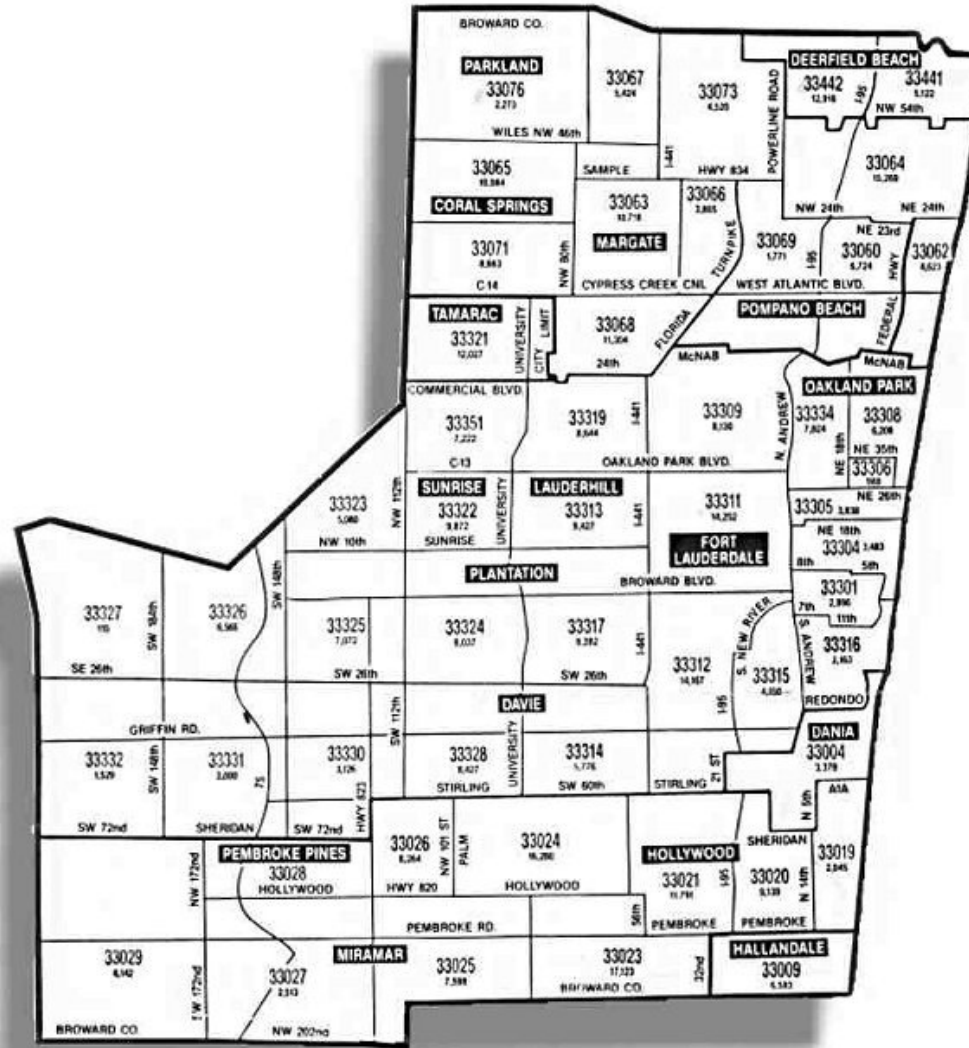

Consistent Themes Across Qualitative Study

- Affordability remains a significant barrier to access
 - high co-pays, deductibles, specialty care can prevent or delay care
- Lack of insurance coverage
- Continuity of care
- Discharge planning
- Immigration status
- Education about resources
- Integration of resources (one-stop shop)
- Cultural competency and racial equity training
- Customer service (people skills)
- Language barriers
- EMR technology that follows patients

A vertical decorative bar on the left side of the slide, featuring a light gray background with a series of overlapping hexagons. The hexagons are arranged in a staggered pattern and are colored in shades of blue and gray, with the top two being light blue and the bottom four being dark blue or gray.

Recommendations and Conclusion

As Broward County continues to grow in diversity, the areas of need for the community remain complex. The recommended next steps for MHS are to 1) Develop an Action Plan for identified priorities; 2) Closely monitor changes in the Affordable Care Act and explore partnership opportunities; 3) Present the results to the community; 4) Implement and track improvements over the next three years; and 5) Report back to the community.

Part of the action plan should address the challenges that remain as more residents become insured. Specifically, there continues to be a need to educate the community about navigating the health insurance system with consideration for the ethnic and cultural diversity that exists in the Broward County community. Also, elements of the action plan should take into account emergency preparedness as hospitals are pivotal players during times of crisis.
